Engineer Platform

Mirrored the site to Gemini and Gopher

Built Gemini and Gopher outputs from the same website source; the achievement records 777 documents in each format at that stage, with zero HTML bytes changed by adding the formats.

September 2026

777

pages mirrored to Gemini, and 777 to Gopher

Situation. The site publishes static documents. Gemini and Gopher provide additional ways to read that content without browser scripting.

Task. The work was to add both formats to the same Hugo content pipeline, keeping their source shared and their addition separate from HTML presentation.

Action. Hugo output formats generate Gemini documents and Gopher menus beside the HTML. The achievement records 777 documents in each format at that implementation stage. The formats use non-alternative representations, and the separate build comparison recorded zero HTML bytes changed when they were added. Gopher prose is wrapped for its text-menu representation.

Result. The 777 figures are historical document counts, not a current inventory or a visitor count. The zero-byte result concerns adding the output formats, not later editorial or visual changes. Both protocols reuse the website source; this record does not turn their availability into a measured audience or commercial outcome.

Bring this experience to your project

Use “Mirrored the site to Gemini and Gopher” as a starting point for a similar challenge in your organisation. The services behind this work are available for your project. Tested, released and reversible, so changes reach customers on a Tuesday afternoon rather than late on a Friday night.

Want your content readable far beyond the browser?

Talk through your project with the engineer responsible for delivery. We agree the scope, price basis and handover in writing before work begins.

Role context: Frontend Engineer. It draws on Frontend Engineering, Web Development, Infrastructure, Automation & CI/CD and Internationalization. And while you are here, we are rather good at Website Development & CMS, Internationalization & Localization and DevOps & CI/CD Automation.
