Cases Get in touch →

Platform and Data Engineer

- A mapping product, carried end to end
- Infrastructure simplified beyond AWS

Data Analyst

- Built the company's first observability dashboard

Database Engineer

- Ran 10 PostgreSQL and MS SQL servers on Ubuntu
- Wrote 1,000 RBAC rules to secure Linux servers

DevOps Engineer

- Automated GIS SaaS deployment with GitHub Actions
- Automated delivery of 20 GIS data pipelines
- Automated 100 critical data backups using Barman
- Ran 20 Docker apps on Google Cloud and AWS

Infrastructure Engineer

- Managed 30 Ubuntu Linux VPS instances
- Led access management across M365 and SSO
- Cut operational risk with Grafana and Prometheus
- Managed 8 WireGuard and IPsec VPN connections

GIS Software Development Team Lead

- Improved team communication and collaboration

Infrastructure Engineer

- Overhauled internal processes, saving 8,000 hours
- Administered network infrastructure
- Ran 24/7 support for ~1,000 IPTV/OTT servers
- Built infrastructure that still runs years later
- Integrated a company-wide password manager

DevOps Engineer

- Automated SSL/TLS certs for 100 Docker apps
- Streamlined CI/CD processes, saving 4,000 hours

Data Engineer

- Saved 4,000 hours with GitHub and GitLab CI/CD
- Automated data processing in Python and PL/pgSQL

System Administrator / IT Consultant

- Configured and deployed 1,000 Wi-Fi routers
- Administered 100 Bare Bone servers

Full Stack Web Developer

- Administered 40 websites on Apache and Nginx

Head of Engineering

- Set a zero-warnings bar across six languages
- Built a 268-check guard engine for the repo

Platform Architect

- Built organization context switching for users

Backend Engineer

- Generated the API contract from the database out
- Built email with failover and delivery logging
- Built Stripe and in-app purchase entitlements
- Moved slow work onto a River job queue

Database Engineer

- 1,022 migrations behind a schema drift gate

DevOps Engineer

- Provisioned Azure infrastructure as code
- Built GitHub Actions CI/CD pipelines
- Authored 578 go-task automation targets

Site Reliability Engineer

- Owned end-to-end platform deployments to Azure
- Implemented backups and disaster recovery as code
- Built first-party error monitoring and tracing

Full Stack Engineer

- Built company ownership claims and adjudication

Security Engineer

- Hardened the application with nonce-based CSP
- Built fail-closed rate limiting and anti-abuse
- Ran a continuous security scanning programme

Network Engineer

- Kept IPTV streaming signals running non-stop

System Architect

- Built the entire core infrastructure from scratch

Process Automation Engineer

- Automated team collaboration

Test & Quality Engineer

- Built a test suite across Go, SQL and browser

Site Reliability Engineer

- Public services on a small server
- Backup automation with an explicit restore method
- Built dead-man's-switch host monitoring
- Cut systemd sandbox exposure on every unit
- Built 7 read-only host reporting roles
- Measured 13 addresses with no tracking
- Made six collectors state what they skipped

Infrastructure Automation Engineer

- Infrastructure defined in a repository
- Made Ansible check mode tell the truth
- Added a one-second preflight for secrets
- Ran containers on Podman and Quadlet
- Provisioned a second server from code

Security Engineer

- Three locks on the door, none of them locked
- Hardened SSH to 24 validated directives
- Proved the intrusion ban works every run
- Verified firewall rules by position
- Wrote a scope rule after a credential leak
- Split every operational secret per host

Linux Systems Administrator

- Your code on your own server

Network and DNS Engineer

- Reconciled a 20-record DNS zone as code
- Published a readable Tor onion mirror

Python Engineer

- Held the generator to 981 tests and 92% coverage
- Enabled every linter rule as an error
- Rehearsed the forge CI hook, found 2 defects

macOS Application Engineer

- A bounded event pipeline for a macOS app
- Wrote a parser verifying every FFI call
- Reached the unused half of the core

Frontend Engineer

- Mirrored the site to Gemini and Gopher

Build and Release Engineer

- Built a 22-linter commit gate
- A safety net that no longer costs half an hour
- Linted the 10,242-line quality gate itself
- Know the licence of everything you ship

Test and Quality Engineer

- Wrote tests for the checkers themselves
- Found the hooks and the gate disagreeing
- Took the test suite to 8.9 seconds

Technical Writer

- Held 4 repositories to one history standard

Digital Presence and SEO Lead

- Fixed a sitemap with one shared timestamp

Services

- AI Agent Readiness
- Custom AI Agent Development
- AI Data Readiness
